excellence in building products

WELCOME

A sincere and warm welcome to Tennants Building Products Ltd.

Our mission is to provide our stakeholders with unsurpassed levels of courtesy, professionalism and business commitment.

Since starting our Building division over 30 years ago, Tennants has grown to become Ireland's largest distributor of specialist interior fit-out solutions, and we remain Ireland's only fully NQA accredited distributor in our field.

Our company motto is simple, "Excellence in Building Products". We strive for excellence through every fibre of our company and demand excellence from every manufacturer we represent. Only the best brands with the best service and quality will pass through our doors.

Yours sincerely,

Dr R A Peden, Managing Director
Charles Tennant & Co

With a proud heritage, dating back well over 200 years, the name Tennants has stood the test of time, and continues to service the construction industry with quality products its customers can rely on. Tennants Building Products is part of the Tennants Group of Companies, which was originally founded in 1797. With an eye on growing markets, the company established trading operations in Belfast (1805) and Dublin (1810), and over the years has expanded its scope to become a leading specialist distributor on an all-Ireland basis. During this time, Tennants Building Products has developed strong relationships with the manufacturers of specialist construction products and now boasts successful partnerships with leading industry names, to ensure that you, the customer, get the top quality products you need and have come to rely on from Tennants.

“excellence in building products.”

We specialise in six core areas – drywall, ceilings, fire protection, insulation, acoustics and external façades – and by concentrating on these sectors, we have been able to develop an enviable, and largely exclusive, portfolio of products for both the specialist and traditional contractor. As a result, we are now recognised as a leading expert within all six of these areas. At the very heart of our business lies a firm focus on customer service. We consider the expertise and industry knowledge of our staff to be a vital part of our continued success. Our extensive technical expertise covers the specification and performance of our extensive product range, and you can rely on the team from Tennants to offer sound advice and information to keep you right when specifying or installing a product – it’s all part of the service.

Tennants building products is a specialist distributor, covering the following areas:

Let us help you meet the latest demands for energy efficiency with our definitive insulation range...

We remain at the forefront of this sector, working alongside manufacturers from across the world to provide wide-ranging solutions for a variety of project types in both the domestic and commercial sector. These solutions come in various forms, including foams, fibres and wools.

However, the company is aware that there is no ‘one-size-fits-all’ solution for projects and the variety of products supplied perfectly reflects that.

Regardless of the product selected, architects, consultants and contractors can be assured that it meets the highest possible standards.

Proven performance and plenty of choice places tennants' cladding range at the forefront of the industry...

Our company has a strong reputation for supplying the construction industry with a range of fully tested and certified exterior products. These include quality façade render systems and finishes; EWIS (External Wall Insulation Systems); and substrate laminate and natural stone boards. Customers also benefit from the knowledge of experienced staff who are available to provide advice on the entire range of products. Choice is a central factor, with more and more architects opting for striking yet functional façade systems that enhance the exterior of a building. However, allied to these high levels of choice for architects are the latest innovations for contractors, which make the installation process much faster and more efficient.

SECTIONS & PROFILES

Tennants now stocks an extensive range of products to suit demanding applications within the healthcare and pharmaceutical industries.

With many healthcare and specialist projects now on our portfolio, we have acquired extensive knowledge and experience in the supply of hygienic and high performing materials. We have supplied many facilities such as hospitals, Bio Technology, Pharmaceutical manufacturing and primary health care clinics. Each has had its own demands, ranging from from Bespoke Hygienic bio-coated panels to various codes of lead-lined X-Ray resistant products. We can cater for Clean Room, R&D Laboratories, X-Ray rooms and operating theatres. We work closely with Europe's top manufacturers and continually strive to bring the latest technologies and innovative product solutions to the Irish market.

Burgess Biocote metal tiles

Biocote antimicrobial technology reduces levels of bacteria. When used in conjunction with various insulation materials, Biocote metal tiles also provide a flexible approach to acoustic performance.
www.burgesscep.com

Ecophon Hygiene

A proven performer, Ecophon Hygiene offers a high performance, sound-absorbing ceiling with hygienic properties, particle repellence and/or airtightness for the toughest requirements.

As exclusive distributor in Northern Ireland and the Republic of Ireland for the Finesse range of demountable office partitioning systems, we can offer creative office solutions to suit any business or work environment...

The Finesse range comprises:

Crystal SG

By using manifestations and innovative storage solutions to maximise floor space, Crystal SG gives architects the opportunity to create work environments that are imaginative and visually stunning. Space is always at a premium and the ultra-slimline crystal sections give a footprint that is barely bigger than the glass itself, creating an almost frameless illusion.

Finesse FS

The Finesse Fire and Sound office partitioning system provides the foundation for the Finesse and Crystal family of demountable high-quality, robust and attractive office partitioning systems. Many of the carefully developed parts are shared between the Finesse Fire and Sound system, the Crystal Double Glazed system and the Crystal Single Glazed system. This unique design feature provides the office planner with total flexibility in layout options, enabling elevation changes from fire-rated or single-glazed to full-height drywall or double-glazed, in any order, at any location.

Crystal DG

The Crystal DG office partitioning system is designed to provide elegant, full-height glazed elevations, incorporating glass thicknesses from 6mm up to 12.8mm. Innovative design features are prominent throughout the range, with smart clip-together sections ensuring fast site erection and cost savings, combined with extremely clean lines in appearance.

Design and technical support is at the heart of Tennants commitment to deliver a professional service from your first idea through to completion

Design

At Tennants we believe we can help right from inception, throughout design and on to delivering the right product at the right price. We will ensure that no compromise is required in order to achieve your vision and goals.

From a very early stage, we pride ourselves on our technical ability and knowledge to assist designers, specifiers and installers to choose the best products at an affordable price for each bespoke application. Many criteria must be considered from fire ratings, acoustics and thermal performance when specifying for today's demanding regulations and standards. We promote only the products that can guarantee these performances and can offer proven longevity. We therefore offer total client satisfaction and can give you the peace of mind that you have made the right choice and have chosen the right partner to engage with time and time again.

New website

We are delighted to announce the launch of our new Tennants' website. Revamped, freshly updated and tailored to meet the demands of today's market, the new website has been specially designed to take into account the pressures faced by

designers and installers and the time frames that they work to. Now, you can find the products you need in a faster, more efficient and direct manner. All of our brands are listed and can be found easily under headings such as brand, category, and even performance. If you have a query, we can be contacted simply by the click of a mouse, and our experienced and professional staff will be happy to assist with additional information to cater for your specific project. Whether for a small repair, a refurbishment or a major new build, at Tennants we strive to ensure that you get the service and the product you want. To help speed up the process even more, we can deliver to any site from any of our depots nationwide.

Distribution

We offer a complete distribution service throughout the island of Ireland, covering our key specialist areas of drywall systems, ceilings, fire protection, insulation, acoustics, external façades and Medicare.

With strategically located depots in Dublin and Belfast providing ready access to motorway systems, and a large fleet of satellite-controlled trucks featuring an extensive range of off-loading options, we are perfectly positioned to supply a comprehensive range of quality products from all leading manufacturers.
